INDEX TO VOL. IV.

ALDRICH, T. B. Is the activity of the digestive ferments inhibited or stopped in a saturated aqueous solution of chloretone? xv.

Alkaline solutions in surgical shock, xiv.

ALSBERG, C. L. See LEVENE and ALSBERG, xi.

Animal heat, influenced by digestion, 397.

Apparatus for estimating muscular contractions, discussion of, 348.

Apparatus for recording muscular contractions in unipolar excitation of nerve, xii.

Arbacia, unfertilized eggs, mitotic division, 343, 445.

Atropine, action on salivary secretion, 482.

BENEDICT, F. G., and E. OSTERBERG. The elementary composition and heat of combustion of human fat, 69.

BEYER, H. G. See PORTER and BEYER, 283.

BURNETT, F. L. See PARKER and BURNETT, 373.

CENTRAL nervous system, decrease in proportion of water with growth, v.

Chætopterus, artificial parthenogenesis, 423.

Chloretone, effect on digestive ferments, xv.

Connective tissue in muscle, 260.

Cypris, reaction to light, 405.

DAPHNIA, reaction to light, 405.

DAWSON, P. M. Effects of venous hæmorrhage and intravenous infusion in dogs, 1.

Depressor nerve, relation to vasomotor centre, 283.

DEWEY, S. L. See KEMP and DEWEY, viii.

Digestion, influence on animal heat processes, 397.

Digestive ferments, activity affected by chloretone, xv.

DONALDSON, H. H. On the decrease in the proportion of water in the central nervous system of the growing white rat, v.

DONALDSON, H. H. The functional significance of the size and shape of the neurone, vi.

EARTH-CURRENTS in a physiological laboratory, iv.

Electricity, action on infusoria, 96.

Electrotaxis, reactions of infusoria, 96.

Entomostraca, reaction to light, 405.

FATIGUE, muscular, 348.

Fertilization, 178, 423.

Fishes, compensatory motions, 77.

FRANZ, S. I. On the methods of estimating the force of voluntary muscular contractions and on fatigue, 348.

GILA MONSTER, poisonous secretion, 209.

Glycogen affected by inulin, 246.

GOODMAN, J. H. On the connective tissue in muscle, 260.

GUENTHER, A. E. See LOMBARD and GUENTHER, iii.

HAND drums, xv.

HANFORD, G. A. The influence of acids on the amylolytic action of saliva, 250.

HARROLD, C. C. See LEE and HARROLD, ix.

HAWK, P. B. See SHERMAN and HAWK, 25.

Heart, action of ions, 265

——, affected by certain toxic products of the typhoid bacillus, viii.

Heloderma poison, 209.

Hæmorrhage, venous, and intravenous infusion in dogs, 1.

HERRICK, J. C. The influence of changes in temperature upon nervous conductivity as studied by the galvanometric method, 301.
HOLT, E. B., and F. S. LEE. The theory of phototactic response, 460.
HOWELL, W. H. The use of alkaline solutions in surgical shock, xiv.
Human fat, composition and heat of combustion, 69.
Hypnotic sleep, 124, xv.

INHIBITION, injury of spinal cord, 334. Iodine in corals, 243.
Ions, effect on ventricular muscle, 265.

JACKSON, H. C. On the phosphorus content of the paranuclein from casein, 170.
JACKSON, H. C. See MENDEL and JACKSON, 163.

KARYOKINESIS, Arbacia eggs, 343.
KEMP, G. T., and S. L. DEWEY. The action of certain toxic products of the typhoid bacillus on the heart, viii.
Kidney, isolated, artificial circulation, xv.

LACTATION, affected by phlorhizin diabetes, xi.
Lactose formation, 239.
LEE, F. S., and C. C. HARROLD. The action of phlorhizin on muscle, ix.
LEE, F. S. See HOLT and LEE, 460.
LEVENE, P. A., and C. L. ALSBERG. The chemistry of paranucleo compounds, xi.
LEVIN, I. Physiological studies on mucine, 90.
Light, response of Cypris, 405.
——, response of Daphnia, 405.
——, response of Entomostraca, 405.
——, response of Planaria, 373.
——, theory of response, 460.
LINGLE, D. J. The action of certain ions on ventricular muscle, 265.
LOEB, J. Experiments on artificial parthenogenesis in annelids (Chætopterus) and the nature of the process of fertilization, 423.
LOEB, J. Further experiments on artificial parthenogenesis and the nature of the process of fertilization, 178.
LOEB, J. On the transformation and regeneration of organs, 60.
LOMBARD, W. P. A cheap support for hand drums, xv.
LOMBARD, W. P. Apparatus for recording contractions, by localized unipolar excitation of the nerve, of an isolated nerve-muscle preparation, xii.
LOMBARD, W. P. Earth-currents observed at the physiological laboratory of the University of Michigan, iv.
LOMBARD, W. P., and A. E. GUENTHER. A convenient form of pressure-bottle, iii.
LUSK, G. The influence of phlorhizin diabetes on lactation, xi.
Lymphatic glands, chemistry of, xii.
LYON, E. P. Compensatory motions in fishes, 77.

MATHEWS, A. P. Some ways of causing mitotic division in unfertilized Arbacia eggs, 343.
MATHEWS, A. P. The spontaneous secretion of saliva, and the action of atropine, 482.
MENDEL, L. B. Brief contributions to physiological chemistry, 243.
MENDEL, L. B. On the occurrence of iodine in corals, 243.
MENDEL, L. B., and H. C. JACKSON. On uric acid formation after splenectomy, 163.
MENDEL, L. B., and R. NAKASEKO. Contributions to the chemistry of the lymphatic glands, xii.
MENDEL, L. B., and E. C. SCHNEIDER. On the sulphocyanide-content of human saliva, vii.
MOORE, A. Further evidence of the poisonous effects of a pure NaCl solution, 386.
MOORE, B., and W. H. PARKER. A study of the effects of complete removal of the mammary glands in relationship to lactose formation, 239.
MOORE, B., and C. O. PURINTON. On cardiac thrombosis following complete removal of the suprarenal glands, 51.
MOORE, B., and C. O. PURINTON. On the absence of the active principle, and chromogen of the suprarenal gland in the human embryo and in the child at birth, 57.
Mucine, physiological studies, 90.
MUHLBERG, W. See PORTER and MUHLBERG, 334.
Muscle, affected by phlorhizin, ix.

Muscle, connective tissue, 209.
——, force of voluntary contractions, 348.
——, smooth, cat's bladder, 185.
——, ventricular, effect of ions, 205.

NAKASEKO, R. Glycogen formation after inulin feeding, 240.
NAKASEKO, R. See MENDEL and NAKASEKO, xii.
Nerve-muscle, apparatus for recording contractions in unipolar excitation of nerve, xii.
Nervous conductivity affected by temperature, 301.
Neurone, functional significance of size and shape, vi.
Nitrogen, sulphates and phosphates, elimination after proteid food, 25.

OSTERBERG, E. See BENEDICT and OSTERBERG, 69.

PARANUCLEIN, phosphorus content, 170.
Paranucleo compounds, chemistry of, xi.
PARKER, G. H., and F. L. BURNETT. The reactions of planarians, with and without eyes, to light, 373.
PARKER, W. H. The occurrence and origin of the xanthine bases in the fæces, 83.
PARKER, W. H. See MOORE and PARKER, 239.
Parthenogenesis, artificial, 178, 423.
PEARL, R. Studies on Electrotaxis. I. On the reactions of certain infusoria to the electric current, 96.
PFAFF, F., and M. P. O. VEJUX-TYRODE. Artificial circulation in the isolated kidney, xv.
Phlorhizin, action on muscle, ix.
Phlorhizin diabetes, influence on lactation, xi.
Phosphorus content of paranuclein from casein, 170.
Phototactic response, 460.
Planarians, reaction to light, 373.
PORTER, W. T., and H. G. BEYER. The relation of the depressor nerve to the vasomotor centre, 283.
PORTER, W. T., and W. MUHLBERG. Experiments concerning the prolonged inhibition said to follow injury of the spinal cord, 334.
Pressure bottle, iii.
Proceedings of the American Physiological Society, iii–xv.
Proteid metabolism, 25.
PURINTON, C. O. See MOORE and PURINTON, 51, 57.

REGENERATION of organs, 60.
REICHERT, E. T. A new rheochord, xv.
REICHERT, E. T. The influences of digestion on animal heat processes, 307.
Rheochord, new, xv.

SALIVA, amylolytic action, 250.
——, spontaneous secretion, 482.
——, sulphocyanide content of human, vii.
SCHNEIDER, E. C. See MENDEL and SCHNEIDER, vii.
SHERMAN, H. C., and P. B. HAWK. On the elimination of nitrogen, sulphates, and phosphates after the ingestion of proteid food, 25.
Sodium chloride, poisonous effects of pure solution, 386.
Splenectomy, effect on uric acid, 163.
STEWART, C. C. Mammalian smooth muscle. — The cat's bladder, 185.
Suprarenal gland, active principle and chromogen, 57.
——, removal causes cardiac thrombosis, 51.
Surgical shock, use of alkaline solutions, xiv.

TEMPERATURE, influence upon nervous conductivity, 301.
Thrombosis, cardiac, 51.
Transformation and regeneration of organs, 60.
Typhoid bacillus, action of toxic products on heart, viii.

URIC acid formation after splenectomy, 163.

VAN DENBURGH, J., and O. B. WRIGHT. On the physiological action of the poisonous secretion of the Gila monster (*Heloderma Suspectum*), 209.
Vascular conditions during hypnotic sleep, 124, xv.

Vasomotor centre, depressor nerve, 283.
Vejux-Tyrode, M. P. O. See Peaff and Vejux-Tyrode.
Venous hæmorrhage and intravenous infusion in dogs, 1.

Walden, E. C. A plethysmographic study of the vascular conditions during hypnotic sleep, 124, xv.
Walden, E. C. Note on Mosso's sphygmomanometer, xv.
Wight, O. B. See Van Deneurgh and Wight, 209.

Xanthine bases in fæces, 83.

Yerkes, R. M. Reaction of Entomostraca to stimulation by light. II. — Reactions of Daphnia and Cypris, 405.

THE AMERICAN

JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

BY

H. P. BOWDITCH, M.D., BOSTON
R. H. CHITTENDEN, PH.D., NEW HAVEN
W. H. HOWELL, M.D., BALTIMORE
FREDERIC S. LEE, PH.D., NEW YORK
JACQUES LOEB, M.D., CHICAGO
W. P. LOMBARD, M.D., ANN ARBOR
W. T. PORTER, M.D., BOSTON

VOL. IV.—No. IX.

Issued January 1, 1901

BOSTON, U.S.A.
GINN AND COMPANY
1901

CONTENTS.

EXPERIMENTS ON ARTIFICIAL PARTHENOGENESIS IN ANNELIDS (CHÆTOPTERUS) AND THE NATURE OF THE PROCESS OF FERTILIZATION. *By Jacques Loeb* 423

THE THEORY OF PHOTOTACTIC RESPONSE. *By Edwin B. Holt and Frederic S. Lee* 460

THE SPONTANEOUS SECRETION OF SALIVA AND THE ACTION OF ATROPINE. *By Albert P. Mathews* 482

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars. To subscribers in other countries, five dollars and twenty-five cents (£1 2*s.*; marks, 22; francs, 27), payable in advance.

Subscriptions, manuscript, and all other communications should be sent to Dr. W. T. PORTER, 688 Boylston Street, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

The American Journal of Physiology is represented:

In America, by GINN & COMPANY, 9 Tremont Place, Boston, Mass.
In Germany by R. FRIEDLÄNDER & SOHN, Berlin, N. W., Carlstrasse 11.

Copyright, 1901, by GINN & COMPANY.

Printed by John Wilson and Son, at The University Press, Cambridge, Mass.

Entered at the Post Office at Boston and admitted for transmission through the mails at second class rates.
